

MK-CML - Horizontal Manual Load Cartoner

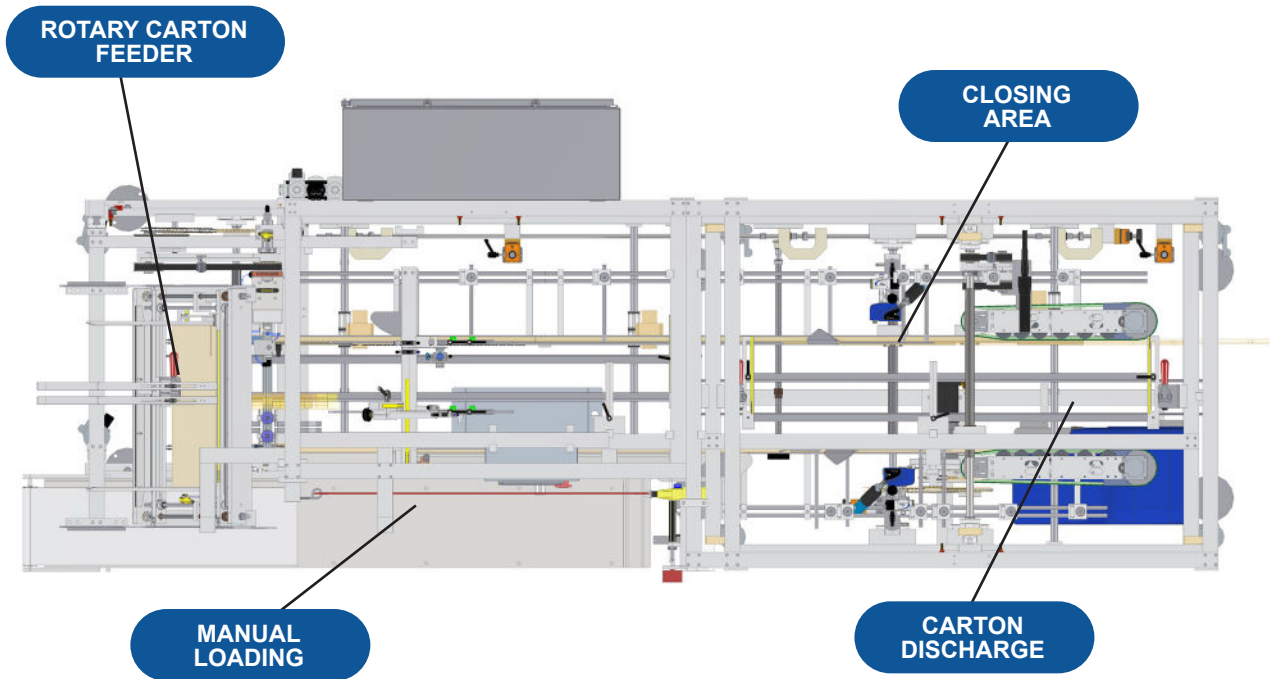

MACHINE FEATURES

- Mechanical cartoning operation.
- Ability to run both glue- and tuck-style cartons.
- Allen-Bradley PLC with PanelView 700 HMI.
- Rotary carton feeder for efficient carton feeding.
- Wet environment construction packages are available.

TECHNICAL SPECIFICATIONS

- 3', 6', or 9' manual load station.
- All safety devices are included with the system.
- Robust cartoner for 24/7 operation.
- Modular design can allow for future retrofits.

Template magazine options let you quickly switch from one carton size to another. Significantly reduces changeover time and operator error during changeovers.

Extended magazine options (either 4' or 8') are available to ensure longer run times between refilling the carton magazine. This option includes low-level alarms and sensors.

The AFA HMI screens are intuitive and provide a useful aid when troubleshooting machinery issues. The HMI screens assist with changeover, setting up new sizes, and adjusting glue unit settings.

CARTON SIZE RANGE

STANDARD	MIN	MAX
*If size outside carton size range please check with AFA Representative		
L	2"	10"
W	.5"	3"
D	2.75"	10.5"
